

Title :- Digital Literacy for Students

Sub title:-Smart, Safe and Responsible Use of Technology

What is Digital Literacy

Digital literacy refers to the ability to effectively and critically navigate, evaluate, and create information using a range of digital technologies. It encompasses a variety of skills, including the ability to use computers, smartphones, and the internet, as well as understanding digital platforms and tools. Beyond basic technical skills, digital literacy also involves understanding online privacy, managing digital identities, and recognizing the credibility of online information. In today's increasingly connected world, digital literacy is essential for education, employment, and personal empowerment, enabling individuals to participate fully in the digital society and make informed decisions in their digital interactions.

Useful Digital Tools for Students

- Google Docs – writing assignments
- GitHub – managing coding projects
 - Google Drive – cloud storage
- Zoom / Google Meet – online classes
- Canva – presentations and designs

Safe Internet Practices

- *Use strong password
- *never share otp or personal information
- *Avoid suspicious link
- *Enable two-factor authentication
- *Download apps from trusted sources
